

## Corporate News of 6 September 2017

AGO AG Energie + Anlagen was assigned a major order in the amount of about EUR 11 million

- ▶ **Erection of a cooling plant with a capacity of 7.5 MW including construction**
- ▶ **Completion by October 2018**
- ▶ **Project to be carried out in corporation with a construction company**

**Kulmbach, 6 September 2017:** A notable automobile manufacturer assigned AGO AG Energie + Anlagen with the erection of a cooling plant with a total cooling capacity of 7.5 MW. The order for the construction of the building and the cooling plant amounts to about 11 million €. The project will be carried out in corporation between AGO AG Energie + Anlagen and a well-known construction company which will be responsible for the building construction. The project is sought to be completed by October 2018.

The turnkey cooling plant consists of 3 x 2.5 MW turbo core chillers with re-cooling units and piping, medium and low voltage system including transformers and instrumentation & control. The chillers will provide cooling energy with a temperature of 8/16°C for the factory.

„We're pleased to have been awarded yet another major order in the field of decentralized energy supply. This is a clear success on the road of our diversification strategy setting a positive signal for the next fiscal year. We consider this a great opportunity to dynamically expand our business unit "plant engineering" and are already negotiating further orders of this kind“, says CEO Günther Hein.

The Board

### About AGO AG Energie + Anlagen:

AGO AG Energie + Anlagen, with its registered office in Kulmbach, was founded in 1980 and is specialized in the area of innovative and efficient energy supply facilities for industrial customers and municipalities.
